### PROGRAM NOTES

A bachelor of science degree requires 120 credits. If the number of credits taken to meet general education and major course requirements totals less than 120 credits, students are to choose "General Electives" that will count toward graduation, but are not required for general education or the major. The number of General Elective credits will be reduced if a four credit, rather than a three credit, general education course is taken. No minor is required for any major in the College of Business. However, if the student chooses to pursue a minor, he or she may utilize the General Electives identified in this plan toward that minor.
