### Program Description:

Electronic Engineering Technology is a technological field requiring the application of scientific and engineering knowledge and methods, combined with technical skills, in support of engineering activities. An electronic engineering technologist is a person who is knowledgeable in electronics theory and design and who understands state-of-the-art practices in digital and analog circuits and systems. Computers controls/automation, robotics, instrumentation, and communications are just a few fields open to engineering technologists.

Overall the program strives to prepare students for entry into the technical workforce with well-developed skills. In particular, the department strives to ensure that its graduates have ability to:

1. Apply knowledge of science, mathematics, and engineering
2. Design, and conduct experiments as well as analyze and interpret data
3. Design a system, component, or process to meet specified needs
4. Function effectively in teams
5. Identify, formulate, and solve engineering problems
6. Have an understanding of professional and ethical responsibilities
7. Communicate effectively

The Educational Objectives for our Bachelor of Science in Electronic Engineering Technology program are to prepare our graduates to:

1. Function as responsible members of society with an awareness of social, ethical, and economic ramifications of their work.
2. Become successful practitioners in engineering and other diverse careers.
3. Succeed in full time graduate and professional studies.
4. Pursue continuing and life-long learning opportunities.
5. Pursue professional registration.
6. Provide foundational education that allows for personal growth and flexibility through their career.

Our metrics for determining success in meeting these objectives will include:

1. Assessment of societal, economic awareness, and ethical performance of our graduates by the graduate and employer.
2. Monitoring the success of our graduates in the work force.
3. Assessment of continuing and life-long learning by the graduate (and their employer as applicable).
4. Provide foundational education that allows for personal growth and flexibility through their career.

### Admission Requirements:

Admission to Major is granted by the department. Minimum college admission requirements are:

-a minimum of 32 earned semester credit hours.

-a minimum cumulative GPA of 2.00 ("C-").

Contact the department for application procedures.

**Advising:**

You are expected to meet with your advisor on a regular basis to ensure courses are taken in an order that will lead to successful completion of the degree.

Faculty staffed general advising occurs once per semester over the course of about a week. One of the scheduled sessions must be attended by every student (undergraduate and graduate) to get the necessary access code required for registration. Sign up sheets will be available. Come to your designated session with a current copy of your DARS report and a completed curriculum advising sheet for your major.

Individual advising at other times can be arranged through your designated faculty advisor as necessary.

A complete listing of program faculty, policies, and course descriptions is available in the undergraduate bulletin.

**Term 8 Notes:**

### PROGRAM NOTES

- Six (6) credit hours of 300-level and 400-level technical electives are required
- One additional EET technical elective may be substituted for Internship (Permission required)
- Must have 20 or more upper division EET credits at Minnesota State University, Mankato
- Must have a cumulative GPA of 2.0 or better for all upper level EET courses
- All courses including general education must be taken for a grade
